WHOLESALE PRICE LIST

for

1939-1940

TERMS OF SALE

(Please read carefully when ordering)

PRICES. 5 and 50 of the same variety and size at 10 and 100 rates respectively. For larger quantity than listed inquire. When the price of a single plant is not listed under "Each" add 25% to the 10 rate. All quotations are for immediate acceptance subject to prior sale.

Discount of 3% offered for orders with cash. Attractive discounts for B&B stock in truck or carload lots.

Additional charges to the listed prices will be made when the customer marks or selects plants in the nursery.

TERMS OF PAYMENT. Cash with order for immediate shipment. Booking orders will be accepted when accompanied by remittance covering 25% of the purchase amounts. C. O. D. orders accepted with a deposit of 25%.

SUBSTITUTIONS. In case you do not desire substitution with the nearest sort, color or size please state clearly on your order "No Substitution".

PACKING CHARGES. Free packing for cash orders. At cost in other cases.

TRANSPORTATION. Please state whether order is to be shipped by parcel post, express, rail or motor freight. When no instructions are given we will use our judgment.

For parcel post shipments be sure to remit amount sufficient to cover postage; otherwise instructions are void.

Our responsibility ceases upon delivery to forwarding

companies; claims for damages in transit should be made upon the latter.

LIABILITY. We are not liable for injury to stock from any cause beyond our control. Unless we make the plantings and are remunerated for it we give no guarantee that the stock will live and grow.

CLAIMS. If, by any possibility, an error has been made please notify us immediately. We will be pleased to promptly rectify the mistake.

REMARKS. Lining out stock is listed here in light face type.

(C) indicates "from cutting", (S) seedling, (G) grafting. (T) indicates once transplanted, (TT) twice transplanted, etc. All lining out stock is in bare roots unless otherwise indicated.

Specimen stock is listed in bold face type; B&B means balled and burlapped.

NOTICE. This price list cancels all previous quotations and are subject to change without notice.

CONIFERS

CEDRUS DEODARA

3-4 feet, field grown, B&B.....	1.50		

CRYPTOMERIA JAPONICA VAR YOSHINO

We are the only nursery offering this valuable variety. It grows into a real symmetrical pyramidal shape and very compact with very fine foliage. This is a much better Cryptomeria than the ordinary variety. Though it thrives in any environment it likes a heavy moist soil best.

6-8 inch, C. T.	1.25	10.00
8-12 inch, C. TT.	1.50	12.00

CUNNINGHAMIA LANCEOLATA

(Chinese Fir)

HOWARD'S ARBORVITAE

The following arborvitae were originated by Howard's Montopolis Nursery:

BLUE CONE ARBORVITAE

Symmetrical and pyramidal shape with dense foliage of bluish tone. A very compact grower.

BLUESPIRE ARBORVITAE

Columnal shape with pleasant bluish foliage. This somewhat resembles Texarkana Glauca Arborvitae, but is much more compact.

GREEN GLOBE ARBORVITAE

Resembles Bonita Arborvitae with very compact growth; globe shaped with rich green foliage.

HOWARD'S IMPROVED HYBRID

Improved from Ramsey Hybrid. Character and habits of this variety are similar to Ramsey Hybrid. but its compact dense growth surpasses that of its parental stock.

Prices on the above four varieties—

----------------------	------	------

AZALEAS

A few cultural suggestions:

1. Azaleas thrive in acid soil. Use plenty of leaf mold (oak leaves most desirable), pond muck or peat moss.

2. Lime or alkaline soil is poisonous. In case the Azaleas are to be planted in such a soil, remove original soil and use plenty of leaf mold or peat moss mixed with the other soil which should contain no alkali; or if alkaline apply Aluminum Sulphate at the rate of one 4 inch pot full to a wheelbarrow of soil.

3. As the azalea root system is very shallow, it dries fast. Apply sufficient water to keep roots moist always.

4. Azaleas delight in a moist soil but it will not tolerate a water saturated soil condition; so Azalea beds should be made where all surplus water will run off quickly.

5. Azaleas thrive best in partial shade (when the bush grows larger it will stand the full sunlight) but many good blossoms cannot be expected if the bushes are planted under complete shade.

6. The Azalea is not a gross feeder. If plenty of leaf mold or like organic matter is applied, it does not require any commercial fertilizer. On the contrary, very often a heavy application of fertilizer injures the root system. However, if necessary a light application of well rotted cow manure, sheep manure or commercial fertilizers such as Vigoro is beneficial.

7. Red Spider and Thrips sometimes trouble the plants. Frequent spraying of the plants with plain water will usually keep this trouble away. If this does not work, spray or dust the plant with a sulphur mixture.

New Azaleas

Several years ago, with special permission of the U. S. government, we imported from Japan many rare varieties of Azaleas. Ever since, we have continued our tireless efforts to develop these varieties. Our devotion of time and utmost care has rewarded us with the pleasure we now have in introducing some of these rare plants to our customers. The supply is very limited. Book your order early.

MURASAKI-BOTAN (Purple Peony)

Belongs to the Ledifolia family. Flowers are made up of 15 to 20 long but narrow petals of light purple color, 2 to 3 inches in diameter. In appearance they very much resemble asters, despite the fact that they are azalea blossoms. It blooms in March. Leaves are narrow and yellowish dull green with hairy segments. Fast grower and very hardy.

SAKURAGATA

One of Macrantha hybrid (Satsuki). Flower is single, 2 to 2½ inches in diameter. Dark crimson with large patch of white in the throat, very beautiful. Leaves medium to small; shiny dark green. This macrantha and its hybrid could stand very much cold weather. Starting in April, its blooming season is closed in June, retaining the afterglory of Indica and Kurume Azaleas all over. Ideal pot plant for late Easter and Mother's Day.

IZAYOI

Macrantha hybrid. Flower single, 3 inches in diameter with very pleasant pink flesh color.

SEI-QUA

Macrantha hybrid. Flower single, 2 to 2½ inches in diameter. Color white, ground margined beautifully with salmon pink. Very compact grower.

WAKAMATSU

Macrantha hybrid. Flower, hose-in-hose, 2½ to 3 inches in diameter. Very delicate purple in color.

BENI-KIRIN

Macrantha hybrid. Flower very double consisting of 15 to 20 petals; 1½ to 2 inches in diameter. Brilliant blood red with darker veins.

PRIDE OF PEACE (Showa-no-homare)

Cross-hybrid of Azalea Macrantha and A. Ledifolia. Semi-dwarf, medium sized flower of a crimson color, with large patch of white in the throat—very beautiful. Blooms two weeks earlier than Macrantha Azaleas.

SEI-KAI

Macrantha hybrid. Flower hose-in-hose, 2 inches in diameter, pure white in color. Leaves small, roundish, dark glossy green. This variety is most compact dwarf grower.

AZALEA INDICA

PINK AND ROSE RED FLOWERS

BRILLIANT. Bright water-melon red, flower medium, mid-season, small leaves, compact.

CROEMINA. Shell pink, large flower, earliest bloomer and very rapid grower, but not compact.

GEORGE FRANC. Flame pink with deep carmine spot near the throat, large flower, early.

HARRY VEITCHII. Beautiful pink, large flower with waved petals. Mid to late season. Rather slow grower.

MAXWELL. Carmine red, mid-season, very hardy.

PERFECTION. Rose pink, large flower, mid-season.

PRAESTANTISSIMA. Carmine red, blooms a week earlier than Pride of Dorking.

PRIDE OF MOBILE. Lovely watermelon pink. Flower very large, mid-season; large leaves, very vigorous grower. One of the best Indica Azaleas.

PRIDE OF DORKING. Beautiful cerise or carmine, late compact grower.

ORANGE RED

COCCINEA MAJOR. Brilliant scarlet, early season, small leaves.

GLORY OF SUNNINGHILL. Large orange scarlet flower, late, compact grower.

MOSS POINT RED. Orange-red with purple spot at the throat. Mid to late season.

PRESIDENT CLAY. Orange-red with purple spot at the throat. Blooms early.

PRINCE OF ORANGE. Flower large, dark orange red. One of the richest colors of all azaleas blooming as late. Leaves medium, dark shiny green. Rather low headed with compact growth.

SALMON

DAPHNE SALMON. Medium flower with light salmon, early.

DUC DE ROHAN. Medium sized flower of lovely salmon pink, blooms early, leaves small, shiny green, compact.

DUKE OF WELLINGTON. Soft salmon with darker center, mid-season.

MOSS POINT LATE SALMON. Pretty salmon color, very large flower with widely waved petals. Very late, hardy vigorous grower.

WILLIAM BULL. ..Double flower of mud red color, late, exceedingly vigorous and upright grower.

LAVENDER-LILAC

FORMOSA. Large lavender flower, mid-season, large leaves; most vigorous grower.

GULF PRIDE. A sport of Indica Alba (*Ledifolia Alba*). Flower medium to large, straight petals of most charming light purple color never seen in other varieties with four or

five large flowers clustered like Rhododendron. It blooms at mid-season. Leaves broad and thick, dull green covered with hairy secretion. Rather upright and open grower unless well pinched back. Very hardy and stands cold better than any other Indica variety.

ORCHID LAVENDER. Medium flower of light orchid lavender pink, very early, upright grower.

PHOENICIA. Lavender pink, mid-season, low and compact.

ROSY PURPUREA. Wine-red color. Late blooming.

VIOLA. A sport of Indica Rosea (Ledifolia Rosea). Character of parent tree faithfully inherited, but the color of the flower is mauve. Very hardy and a vigorous grower.

WHITE

FIELDERS WHITE. Early, large pure white flower. Strong upright grower.

FLAG OF TRUCE. Mid-season, full double with waved petals.

INDICA ALBA. (Ledifolia Alba). Snow white large flower, early to middle season, very hardy.

LATERETIA ALBA. Medium size, pure white flower, late. Small leaves, very compact.

VARIEGATED

CRITERION. White ground well marked with wide pink stripes, late and compact.

INDICA ROSEA. (Ledifolia Rosea). Extra large flower of white with rose throat. Mid-season, upright.

IVERYANA. White ground marked with narrow, faint pink stripes, late and compact.

LADY EDITH. Variegated just like Criterion, but the flower is slightly smaller and the pink color is softer. Mid-season, compact.

VITATA FORTUNEI. White ground well striped with lavender pink. Very early, upright, open grower.

AZALEA INDICA, BELGIAN VARIETY

- ALBERT ELIZABETH**—Large double flower, ivory-white with frilled deep pink edge. Leaves medium to large, waxy dark green. Mid-season.
- BLUSHING BRIDE**—Very beautiful large double flower, light pink in color. Leaves large and glossy. Middle to late season.
- COUNT DE KERCKHOV**—Large, fringed double flower and variegated rose pink in color with white edge. Leaves large and glossy. Middle to late season.
- ECLAIREUR**—Deep crimson darker than Triumphe. Full double; leaves medium dark green. Middle season.
- MME. PETRICK SUPERBA**—Semi-double large flower light lavender in color with white edge. Leaves shiny green, narrow and small. Very early bloomer.
- NIOBE**—Large double flower greenish white in color. Leaves large, roundish and thick. Blooms late in season. This is one of the popular varieties for the Easter trade.
- PAUL SCHUME**—Large double or semi-double flower, color of beautiful red salmon. Early bloomer.
- TRIUMPHE**—One of the best varieties. Large double flower of dark crimson color. Leaves large and dark glossy green. Very vigorous grower. Blooms mid-season.
- VERVAENEANA**—Large double flower with salmon rose with lighter border. Leaves large and glossy green. Blooms early and a vigorous grower. Most popular variety.
- VERVAENEANA ALBA**—Best white variety. Flower large and full double white. Leaves large and shiny green. Blooms middle of the season.

KURUME AZALEAS

(Azalea Obtusa, Kirishima, or Kurume)

This variety which we today call "Kurume Azaleas" originated in the Kirishima Mountains in Japan and cultured and improved at Kurume, a city of the same province.

The flowers are small when compared to the Indicas but are a much more profuse bloomer; when in full bloom the leaves cannot be seen. Some produce a single flower, others a double flower which is described as a "hose in hose" type. As a group they are dwarf plants with small shiny dark green leaves.

The Kurumes withstand lower temperatures than the Indicas; when planted in sheltered locations they will thrive as far north as Long Island. These are ideal plants for pots, borders, and rock gardens.

AMOENA—Very popular variety. Flower rose purple.

APPLE BLOSSOM—White shaded pink with light center. Leaves are a very glossy green.

BENIGIRI—Bright deep pink, single, mid-season, upright grower.

BRIDE MAID—Bright salmon red flower in large trusses. Mid-season, low, compact.

CARMINE PRINCE—Large size hose-in-hose carmine red in color, mid to late bloomer.

CHRISTMAS CHEER—Pleasant Christmas red, flower rather small, hose-in-hose. Heavy bloomer, early compact.

CORAL BELL—A pleasing coral pink color shading deeper toward center. The flower is very dainty and is produced profusely. Hose-in-hose type. Low, compact.

DAYBREAK—Light pink flower in dense clusters, mid-season.

FLAME—Single large flower of brick dust red, blooms very early, upright vigorous grower.

HEXE—(Firefly)—A Kurume hybrid of low dense compact habit. Flower large in size for this group. Pleasing crimson red. Semi-double, mid-season.

KURUME AZALEAS

Left to Right: 6-8 inch, 8-10 inch, 10-12 inch

HINAMOYO—Also upright grower, leaves small and branches slender. The flower, medium size, is soft pink. Mid-season.

HINODEGIRI—Most popular Japanese variety. Medium size single flowers of bright scarlet color. Leaves roundish, glossy green, very dwarf and compact.

MAUVE BEAUTY—Beautiful shade of mauve, medium size flower, very dainty.

ORANGE BEAUTY—Good size flower of orange red color. Mid-season, compact.

PEACH BLOW—Single, pale shade of peach blossom pink. Mid-season, very fine.

Overlook 13 Nursery

(Continued on Page 15)

MACRANTHA AZALEA

(Azalea Indicum Macranthum, Satsuki Azalea)

A distinct characteristic of this variety is the lateness of its blooming period. It blooms very late, usually in April, May and June and some throughout the whole summer. Those desiring to have azaleas in bloom after spring should try these varieties.

The flower is similar to the Indicas in size and colors. Without its flowers it makes a very beautiful plant for the garden. It has very small and shiny dark green leaves; and grows compactly, dwarflike. Very hardy.

KIMUNAZOI—Single orange red flower with extremely narrow petals. It blooms in June. Leaves very narrow; a low and dense grower.

MACRANTHA—Large single flower of clear pink, very late, low headed and compact.

MACRANTHA DOUBLE—Double flower of large size, clear pink. Very late, compact but rather upright.

MACROSTEMON—Large salmon pink flower blooming in May.

Prices of the above Macranthas same as Kurumes.

NEW HARDY KAEMPFERI HYBRID AZALEA

BETTY—Brilliant crimson pink of large size.

FEDORA—Deep salmon rose.

MARY—Pretty deep pink. Distinct from all others.

OTHELLO—Orange red, vigorous grower.

PURPLE KING—Purplish rose.

NEW KURUME AZALEAS

Several years ago we imported a number of Kurume Azaleas from Japan. Since then we have been experimenting with them and watching their development. This season we are very glad to be able to offer to our customers a few of them as follows:

FUJI-NO-ASAHI. The flower is hose-in-hose, medium to large in size. Color: White with faint salmon pink flushed on the tips of the petals as sunlight would flash on the snowy peak of a mountain. Leaves are large and thick with very shiny dark green. It is a vigorous grower.

KUMOI. The flower is hose-in-hose medium to large with somewhat crinkled petals. Color: light crimson-carmine with less coloring at the throat. Leaves are medium to large and shiny green.

MIZU-NO-YAMABUKI. Flower small, hose-in-hose; color is creamy white. This is the only variety of the several hundred azaleas producing a yellowish flower. Leaves very small and a very compact grower.

YAKUMO. The flower is of medium size, hose-in-hose with roundish petals of maroon red. Leaves are roundish and medium; very compact.

Prices on the New Kurume Azaleas—

CAMELLIA JAPONICA

Commonly known as “*Japonica*” in the South; becoming recently a most popular plant not only in the Gulf Coast region, but all over the country. Its glossy green foliage all the year around together with most attractive and beautiful flowers in winter when no other flowers are found in the garden has been increasing the admirers of this plant. Millions of them are set out every year in open grounds or in conservatories and green houses as pot plants. It will regain without any doubt a popularity stronger than it possessed half a century ago even as cut flowers.

Brief Cultural Hints

Soil Preferred—Camellia grows in almost any soil, but well drained, good garden soil a little acid in reaction is more suitable.

Location Desirable—Half shady location is preferable, especially when the plants are young. Free blooming cannot be expected in a place entirely shaded.

Root System, Transplanting—The root system of the Camellia is rather coarse and not quite so easily transplanted as the azalea. For this reason we recommend strongly potted plants especially for lining out.

Fertilization Effective—The Camellia is a gross feeder; it responds well to fertilization. At the time of planting if the soil is not fertile enough, use a mixture of one-half of garden soil, one-fourth of well rotted cow manure and one fourth of peat or leaf mold. Every winter or early spring apply well rotted cow manure; bone meal or cotton seed meal, or similar commercial fertilizer may be added if necessary. Mulching with half rotted leaves or peat is also beneficial.

Proper Watering—The Camellia loves a humid atmosphere. Do not neglect the watering. Frequent syringing on the leaves helps a great deal during the dry summer months.

Pruning Right—Proper pruning is also essential. Prune with care such as water shoots, dead or injured branches and

branches growing too close together. General pruning should be done in the month of February; otherwise it may have a bad effect on the flower buds.

Spraying Advisable—Red spider and various scales may attack Camellias. We have been using "Volck Jr." at the ratio of 1 to 40 in the summer and 1 to 25 in winter, mixing one teaspoonful of Black Leaf 40 to every gallon of solution. Thorough spraying twice a year controls these pests satisfactorily. The strong sun has to be avoided after spraying as it may cause the leaves to burn.

NEW CAMELLIAS

For many years we have devoted much of our time and care to produce new varieties of Camellias. Our tireless efforts in this enterprise have been rewarded. We are proud to introduce to our customers this year a number of these unusual and very exquisite new creations.

As our supply of these new varieties is very limited, we are able to offer them only to the purchasers of standard varieties of Camellia. Moreover, each customer is limited to ten of a variety. No discount of prices.

IMURA (Our Seedling #12)

Semi-double flower 5 to 6 inches in diameter, consisting of 15 large petals of a snowy white and porcelain texture and numerous yellow stamens in the center. The anthers of the flower is very large and shaped like an arrow or spear, very distinct from other varieties. Blooms mid-season. Leaves are large, narrow and long, smooth, very shiny dark green.

LURIE'S FAVORITE (Our Seedling #172)

Semi-double flower 4 to 5 inches in diameter. Has 16 to 18 petals which are crinkled and resemble crepe paper in texture. Color: soft pink with darker veins. Blooms abundantly mid-season. Leaves very small, roundish, smooth and very shiny dark green. Compact grower.

QUEEN BESSIE (Our Seedling #127)

Semi-double flower 5 to 6 inches in diameter with 12 large petals and numerous yellow stamens. Color: clear white with faint flushes around the center presenting a very soft and delicate appearance. One of our best hybrids. Blooms mid-season, rapid grower with large dark green leaves.

RISING SUN

This is one of the best single flowered Camellias that we have. The flower which is 4 to 5 inches in diameter opens flat showing 6 large petals and numerous yellow stamens. Certainly a beautiful flower—bright crimson red of velvety softness. Anthers are a bright yellow, filaments pink.

One plant to a customer with other orders.

SARA-SA (Our Seedling #119)

Semi-double flower 4 to 5 inches in diameter. Has 12 large petals and yellow stamens at the center. Flesh color dotted and striped with darker pink. Blooms mid-season. Large leaves; very vigorous grower.

WHITE PINE CONE (Our Seedling #179)

Flower semi-double, 3 to 4 inches in diameter with 16 narrow pointed incurved petals. This flower is quite different from all others in shape. It resembles a pine cone before it opens. Pure white in color, blooms late. Leaves large and thick, rapid grower and very hardy.

Prices on these new varieties—

	Each	10	100
8-10 inch, mostly single stem, lath-house grown, B&B.....			3.00
10-15 inch, mostly single stem, Lath-house grown, B&B.....			5.00

RARE CAMELLIAS

These varieties are the finest and are still very scarce in the market today. As our supply of this class is very limited, we offer the following varieties to customers of standard varieties only. No discount given for this division. We have some kinds in sizes larger than listed.

VICTOR EMANUEL—The finest Camellia that we know today. Very large peony shaped flower, deep velvety red.

8-10 inch, lath-house grown, B&B.....3.00

10-15 inch, lath-house grown, B&B....5.00

PURPLE EMPEROR—(Mathotiana Rubra, Purple Dawn, etc.)

Flower very large, 5 to 6 inches in diameter. Rose type dark crimson red mixed with purple.

C. M. HOVEY—Flower resembles Purple Emperor, but variegated with white. Very fine.

JULIA DRAYTON—Very large flower, rose type, resembles Purple Emperor.

WM. S. HASTIE—Nearly identical with Purple Emperor.

SARA C. HASTIE—(Debutante)

Flower peony type, very light pink. Blooms very early.

EMPEROR—(Emperor of Russia)

Semi-double to double flower of large size. Has large petals of dark crimson red. Very large and roundish thick foliage.

EMPRESS—(Lady Clair, Grandiflora Rosea, etc.)

Single to semi-double, light pink and very large flower.

LEWIS RED PEONY—Semi-double to double peony type flower, 4 to 5 inches in diameter (often 6 inches). Color is a brilliant red shading into a deep crimson with a velvety tone. This fine variety blooms mid-season.

GIRARD DE BAILLON—We believe this to be the most charming Camellia now in existence. The flower is not very large, 3 to 3½ inches diameter. But it is an attractive form of peony type with a charming color combination of brilliant red and white. A slow grower.

LADY HUMES BLUSH—Very famous old variety but yet rare. Full double rose type flower, white with delicate flesh pink. One of the best for corsages.

PURPLE PEONY—(Wm. Penn)

Flower semi-double to double, peony type of medium size. Real dark crimson to deep purple color with large white markings. Plants are very slender with weeping branches of deeply serrated leaves.

DAINTY—This is the first year that we have put this variety in the market. The single flower, 3 to 3½ inches in diameter, is bell shaped. Has five petals of soft pink and numerous yellow stamens. A tree loaded with blooms is a charming sight.

Prices on the above varieties—

	Each
8-10 inch, lath-house grown, B&B....	1.50
10-15 inch, lath-house grown, B&B..	2.00

AUGUSTA WILSON—It is our great pleasure to have named this variety "Augusta Wilson" in memory of a famous writer of Mobile. She was very fond of this variety and planted it in the gradens of her home in Ashland Place many years ago.

The flower is very double and peony type, 3½ to 4 inches in diameter. It is a soft pink; some flowers are marked with faint white spots. Blooms before Christmas. Leaves are large, thick and roundish.

The smaller sizes have already been sold out. We can supply only larger sizes field grown.

ALBA PLENA—Very famous old variety, yet very scarce. Flower is full double, pure snowy white. One of the best whites, but tender.

GOVERNOR MOUTON—A famous variety from Louisiana. A large peony type flower, oriental red marked with white spots. Free bloomer at mid-season.

LADY VAN SITTI VARIEGATA—One of the most beautiful of variegated Camellias. Semi-double flower 3½ to 4 inches in diameter often reaches 5 inches). Pure white base striped with various shades of red. Leaves are small and narrow, very crinkled. Grows upright and compact.

KUMASAKA—A Japanese variety. Large peony type flower of deep pink.

MARY E. M. (from Jungle Gardens)

Large salmon pink flower, semi-double. Blooms from mid to late season. Vigorous grower and free bloomer.

MATHOTIANA ROSEA—Sport from Mathotiana Alba. Very double flesh pink, rose type.

MONARCH—(Gunelli, Honneur D' Amerique)

Peony type flower of deep pink often spotted with white. Blossoms often measure 6 inches across.

PEONYFLORA—(from Jungle Gardens)

Entirely different from the "Peonyflora" on the West Coast. Very large flower, often measuring 6 inches across. Semi-double to double, peony type, dark crimson in color.

Prices on the above nine varieties—

	Each	10	100
2½ inch Pot, (Spring delivery).....	.30	2.50	20.00

CAMELLIA JAPONICA

Left to Right: 2½ inch Pot; 8-12 inches lathhouse, B&B;
12-18 inches lathhouse, B&B.

Letters from Our Customers

We have received several thousand very encouraging letters from our customers who have been well pleased with our plants. That makes us very happy for only insofar as we have satisfied our customers do we feel that we have made progress in our business.

Overlook Nurseries,
Crichton, Ala.
Gentlemen:—

Jacksonville, Fla.,
August 30th, 1939.

I am much pleased with the quality of Camellia stock obtained from you last spring. They were all fine thrifty plants and were received in good condition due to the careful packing.

Yours truly,

STANDARD VARIETIES

Group A:

CHANDLERI ELEGANS—Semi-double to double peony type flower. The flower, one of the largest of all Camellias, is a pretty cherry red with white variegations. Blooms mid-season; slow grower.

CANDIDISSIMA—Very double flower of medium size. Petals overlap each other symetrically forming a star. pure white bloom in late season.

COUNTESS OF ORKNEY—Large, very double rose type flower. The usual color is white with pink stripes, but sometimes solid pink flowers appear on the same bush. Slow and compact grower, but blooms very young. Fine variety for pot culture.

HERME—Very large semi-double flower variegated pink and white. Generally, the margin is white. A very popular variety.

LADNIER'S RED—(Prince Eugene Napoleon, Pope Pius IX, etc.)—Large flower, very double, bright red to dark red, sometimes spotted with white. Hardy and a free bloomer.

LADY VAN SITTI—Very large flower, semi-double, of a most pleasant shade of red. Blooms freely mid-season. Very small and narrow pointed leaves, crinkled and very shiny dark green. Upright grower.

LADY SAUMAREZ—Large single to semi-double flower. Brilliant dark red with white spots. Resembles Donklaeri, but smaller. Early and free bloomer.

OPELOUSAS PEONY—(Althea Flora by some nurseries) Peony form flower with light pink and white; occasionally they are solid pink.

OTOME—Full double, flesh pink with darker veins. Much like Pink Perfection.

PINK PERFECTION—Most popular variety. Full double, light pink. Early and free bloomer.

STILE'S PINK PERFECTION—(formerly called by us Rubra Virginalis)—An outstanding variety. Peony type flower 3 ½ to 4 inches in diameter. Pleasant soft pink color. Early and free bloomer. Small leaves.

PROF. C. S. SARGENT—Full double, peony type tightly formed. Very dark red color. Blooms freely mid-season. A very popular variety.

PURITY—Pure white, full double flower with open center.

TEUTONIA—Full double rose type. The tips of the petals are curved in; petals overlap each other symetrically. The original tree produced various colors—fleshy pink, white faintly striped with pink and bright red. Very slow and compact grower.

WHITE TRICOLOR—A sport of Tricolor. Pure white semi-double flower with yellow stamens in the center.

PRICES ON GROUP A—

Sizes larger than listed on application.			

Group B:

ABBY WILDER, PINK— Full double peony type flower, medium size, flesh color. Very beautiful.

ANNA FROST—Semi-double, large loose peony type, dark blood red in color. Large, round and thick extra shiny dark green leaves.

BROOKLYANA—Very double, medium sized flower; deep pink mottled with white. Blooms early. Leaves large and thick. Vigorous grower.

CARNATION—(Rose Emry, Orient, etc.)
Medium sized peony type flower. Dark red crimson blooms look like carnations. Very hardy.

CHEERFULNESS—Double, medium sized rose type flower. Deep pink, blooms very early. Upright grower.

DARSII (Campbelli)—Medium flower, semi-double, pleasant bright red.

DIXIE—Medium sized flower, very double, rose type. Rose pink petals symetrically formed.

✕ **DUKE DE ORLEANS (Marguerite Guillon)**—Large flower, peony type; creamy white striped and dotted with pink and red. Hardy and blooms well.

ELATA—Very large semi-double flower. Semi-peony type with yellow stamens. Deep rose to carmine color. Blooms mid-season.

✕ **ELIZABETH**—Flower double, medium, usually white but often striped with faint narrow pink stripes. Very strong grower.

✕ **GLORE DE NANTES**—Large semi-double flower, deep rose color. Leaves are large, roundish, thick and very shiny dark green, which easily identifies it from all others.

JARVIS RED—Large semi-double flower with long crinkled petals. Dark vermillion color. Very popular on the Gulf Coast.

➤ **MARIE LOUISE (No. 60)**—Double peony type flower of medium size. Pleasant red marked with white—very beautiful. Slow grower and has spreading habit.

MATHOTIANA ALBA—Large full double rose type flower, pure white but occasionally striped with faint pink. Leaves very large and thick.

➤ **MRS. HOFFEINS VARIEGATA (No. 27)**—Large semi-double flower, white striped with pink. Sometimes a solid pink flower is produced on the same bush.

NOBILISSIMA—Semi-double peony type flower with yellow stamens. White color with a creamy tint around the center. Very early.

RUBRA VIRGINALIS—(Formerly called Jeanerette Pink by us) More familiar along the Louisiana coast. Loose peony type, salmon pink. Very fast grower.

SARAH FROST—Very popular on the coast. Dark crimson, full double rose type. Hardy.

TRICOLOR—Large single to semi-double flower, white striped with pink. (Once in awhile it produces a red flower.)

➤ **WARRATAH—(Honeycomb)**—Very double, peony flower. Resembles Prof. Sargent, but the guard petals are five in number and the center of the form is very tight like a comb of honey.

CAMELLIA SASANQUA

Despite its recent introduction to this country, the Camellia Sasanqua has already become widely known and is gaining popularity among flower-lovers with wonderful rapidity. It blooms ahead of Japonica by months—generally from September to December. Size of blossom is about the same as Camellia Japonica in different colors. Leaves are much smaller and the branches are slender, which appearance gives a softer tone to landscaping. It has value also as a pot plant.

CLEOPATRA—One of our introductions from Japan. The flower is semi-double, peony type, 3 inches in diameter with 12 to 14 petals and a few yellow stamens. Color is rose pink. The leaves are roundish in shape and dark shiny green. Very compact grower.

	Each	10	100
4-6 inch, C. T.		2.00	15.00
6-8 inch, C. T.		2.50	20.00
12-18 inch, field grown, B&B.....	1.00	7.50	
18-24 inch, field grown, B&B.....	1.50	12.50

3-4 feet, field grown, B&B.....	3.00	25.00
4-5 feet, field grown, B&B.....	5.00	40.00

DAWN (Aketono)—This is the hardiest Sasanqua of all, withstanding the severest freezes. When the buds of the other varieties are frozen its blooms stand perfectly. The flower is single to semi-double ivory white with flesh pink at the margin of the petals and yellow stamens. The leaves are small, narrow, dark shiny green. Very compact, symmetrical pyramidal shape; slow grower.

4-6 inch, C. T.	2.00	15.00
6-8 inch, C. T.	2.50	20.00
12-18 inch, field grown, B&B.....	1.00	7.50
18-24 inch, field grown, B&B.....	1.50	12.50

CRIMSON BRIDE—We secured this beautiful variety out of many thousands of seedlings. Flower single, a good size, crimson color with yellow stamens. Leaves medium; compact grower.

4-6 inch, C. T.	1.50	12.50
6-8 inch, C. T.	1.75	15.00
12-18 inch, field grown, B&B.....	.75	5.00

ILEX (Holly)

Holly of any variety in general is very difficult to transplant, therefore we offer this year some varieties carefully grown in pots, as we know that the best results are to be obtained by this method.

I. CASSINE (Dahoon Holly)

A popular evergreen, native of northern Florida. Leaves have no spine, much resembles Ilex Integra, but not so shiny green as the others. Producer of bright red berries in abundance.

ILEX CASSINE ANGUSTIFOLIA

An evergreen with very narrow leaves. Produces red berries at an early age.

Prices on the above two varieties—

2-3 feet, sheared, field grown, B&B..	1.25		
3-4 feet, sheared, field grown, B&B..	2.00		

I. VOMITORIA NOBILIS

This strain was found a few years ago by Mr. Garee of the Noble Nursery, Noble, Oklahoma. He picked up one tree in perfect condition among several thousand common Yaupons badly injured or killed by an unusually severe freeze which visited that locality one winter. Propagation with cuttings from this plant was carried successfully and no crop missed ever since. Compared with the other Yaupons the leaves of this strain are slightly thinner in texture and larger. It grows faster and more compactly in addition to its resisting power from freeze.

4-6 inch, C., 2 1/2 inch pot	1.00	8.00

PHOTINIA GLABRA

This beautiful shrub was introduced by us to this country Whenever covered with new sprouts Photinia Glabra is a mass of burning scarlet, tinted here and there with old leaves of green. You will surely be convinced that this is one of the best trees ever introduced. There are several different strains; beware of the inferior kinds. It may be made in any shape you desire, such as pyramidal, standard or globe. Suitable for hedge, individual planting as well as mixed setting among green leaved evergreen.

LESPEDeza FORMOSA
(Purple Bushclover)

One of the most attractive herbaceous shrubs. It blooms twice a year (May and September) and bears a profusion of rosy purple sweet-scented, pea-shaped flowers on arching branches. The tops freeze out in severe winter but come back each spring.

ORIENTAL MAGNOLIA

Although not known much in the South, Oriental Magnolias are most highly esteemed by Northern and Eastern gardeners. It is a very beautiful flower in early spring.

M. DENUDATA

Well known as Magnolia Conspicua. Large pure white flowers appear at early spring before its leaves come out.

2½ inch pot, (cutting of summer 1939)30	2.50
--	-----	------

M. DENUDATA HYBRID

Grows to a tree 25 to 30 feet high. Flower much larger than M. Soulangeana, 9 petals. Color ranges from white with pink to almost white. Leaves roundish and very large. One of the best Magnolias.

2½ inch pot	2.50	20.00
2-3 feet, field grown, B&B.....	2.00	
3-4 feet, field grown, B&B.....	3.00	

M. ALEXANDRINA

Hybrid of Magnolia Denudata and Magnolia Liliflora. It is similar to M. Soulangeana but grows much taller and both the flower and foliage are larger. Large flower of nine petals, heavily flushed rose purple with darker lines. Leaves somewhat curled and of a very soft texture. In our nursery Alexandrina blooms from a week to 10 days later than Soulangeana. Hardy and vigorous grower. The parent trees from which our cuttings are obtained are over 35 feet high. This magnolia is more beautiful than Soulangeana; a very valuable kind.

2½ inch pot, (cutting of summer 1939)30	2.50
--	-----	------

M. LILIFLORA

Lily shaped flower, dark purple at the outside and creamy white on the inside of the petals. Late bloomer.

2½ inch pot	1.25	10.00
2-3 feet, field grown, light, B&B.....	1.25	10.00
3-4 feet, field grown, heavy, B&B....	1.50	12.50
4-5 feet, field grown, very heavy, B&B	2.00	17.50

M. SOULANGEANA

Most popular variety, also known as "Saucer Magnolia". Flower white with rose pink base. Blooms profusely before leaves appear.

	Each	10	100
2 1/2 inch pot		1.75	15.00
2-3 feet, field grown, B&B.....	1.25	10.00	
3-4 feet, field grown, B&B.....	1.75	15.00	

M. SOULANGEANA ALBA SUPERBA

Similar to the above. Flower is whiter and leaves larger.

2 1/2 inch pot (cutting summer 1939).....	1.75	15.00
2-3 feet, light, field grown, B&B.....	1.25	

M. SOULANGEANA NIGRA

Similar to M. Liliflora except its much darker purple color on both sides of the petals.

2 1/2 inch pot	1.25	10.00
18-24 inch, field grown, B&B.....	.90	8.00
2-3 feet, field grown, B&B.....	1.25	10.00

M. SOULANGEANA LENNI

When open the flower is saucer shaped, very dark vermillion red or purple in color. Late bloomer.

2 1/2 inch pot(cutting summer 1939).....	1.75	15.00
2-3 feet, field grown, heavy, B&B....	2.00	
3-4 feet, field grown, very heavy, B&B	2.50	

M. SOULANGEANA, DARKEST PURPLE

This new variety was established from some seedlings. The growth and habits resemble M. Soulangeana Nigra, but the flowers are larger and they have 9 petals instead of the 6 petals of the former. Color is much darker purple than Nigra, almost black.

2 1/2 inch pot (cutting summer 1939).....	2.50	20.00
2-3 feet, field grown, light, B&B.....	1.50	
2-3 feet, field grown, B&B.....	2.00	

M. STELLATA
(Star Magnolia)

Rather dwarf. Flower is much smaller than the other Magnolias, but is dainty, delicate, pinkish white, star shaped. Favorite in the spring garden.

2 1/2 inch pot, (cutting summer 1939).....	1.75	15.00
18-24 inch, field grown, B&B.....	1.50	12.50
2-3 feet, field grown, B&B.....	2.00	17.50

JAPANESE FLOWERING CHERRY

Heretofore it was believed by many Southern gardeners that the Japanese Flowering Cherry tree could not be successfully grown down South. It is now, however, proved by us that they can be, if the varieties best acclimated are used. You are invited to visit us and see for yourselves thousands of them thriving wonderfully and blooming in our nursery grounds.

PRUNUS YEDOENSIS (Somei-Yoshino)—One of the most popular varieties in Japan, being planted in parks, temple grounds, school yards, along the river banks and highways in Tokyo. A rapid grower with rather slender branches. Estimated height about 30 feet. The flower is rather small and 3 to 6 flowers in a corymb or cluster. Pinkish white in color, slightly fragrant. It blooms profusely before young leaves sprout.

3-4 feet, own roots, BR.....	.50	4.00	30.00
4-5 feet, own roots, BR.....	.75	6.00	
5-6 feet, own roots, BR.....	1.00	8.00	
6-8 feet, own roots, BR.....	1.50	12.50	

PRUNUS CAMPANULATA (Winter blooming Cherry)—Very early bloomer. The flower is small, single and bell shaped. Every branch is covered with brilliant rosy red flowers when in bloom. Thrives best in warm regions.

8-10 feet, grafted on Japanese Cherry, B&B	2.50
--	------

JAMES H. VEITCH (Fugenzo)—A variety which thrives in warm regions. Large double pink flowers blooming in spring. One of the best varieties.

2-3 feet, own roots, BR.....	.75.
3-4 feet, own roots, BR.....	1.00

Note: We are unable to offer *Prunus Lanneseana* this year.

RHODEA JAPONICA

A fine house plant from Japan. It resembles Sanseveria somewhat, but is more dwarfed. It has dark green curled leaves and spikes of creamy white flowers, which are succeeded by spikes of showy red berries. Very attractive; varieties of this kind are esteemed by the Japanese so much that sometimes as much as one to five thousand dollars is paid for a single plant.
